

CLASSROOM MANAGEMENT - UDL LESSON PLAN

SUBJECT: English

GRADE: 8th

TEACHER: Paula Flores

UNIT: 2	LESSON: 1
Lesson Objective/S:	To identify vocabulary related to Places in Town.
Assessment/S:	Formative - Summative
Materials / Resources:	PPT/Canva, Markers, bingo cards, stickers.
Preplanning Activities:	Regarding the student's level, they have an A2 level of English, so most of the words they are capable to understand. The teacher uses English most of the time during the class; however, when an explanation is presented, Spanish is used to make sure every student comprehends the contents. As for the methodologies, they seem to participate most of the time, and they can express their own ideas, so the communicative approach is suitable for them. The content they are seeing is regarding the new vocabulary "places in town" of the new unit, so they might be familiar with some words but not all of them. For this reason, we thought about connecting the new vocabulary with real-life situations, in which they can imagine some things that relate to what they usually see in their daily lives. As for the materials, we will mostly be relying on using a Canvas presentation, and we will also be doing a bingo game, in which we will design some bingo cards.
Possible Barriers to Learning:	Hesitation, students' misbehavior, confusion regarding the instructions, the students having forgotten the vocabulary, motivation, or mood in the day, and willingness to participate.

Lesson Element	What I (T) am going to do	What Learners are going to do (Student centered)	UDL Multiple Means of... - ENGAGEMENT - REPRESENTATION

			ACTION & EXPRESSION
Lesson Opening	The teachers greet the students and ask them how they feel. The agenda is presented, explaining that the class will be about places in the city. Afterwards, the rules (1. Listen when the teachers speaks, 2. Raise your hand to talk, 3. Be respectful and speak in English) are presented. Then, the teachers give the instructions to a short warm-up activity, in which they randomly ask some students to take a guess about what they think is being shown on the screen, since it is a zoomed image of a place in their town. After five students have guessed the image, the complete image is finally revealed. This way, the teachers introduce the learning outcome, which is to identify places in town, and it is related to what they saw in the warm-up.	The students greet the teachers and tell them how they feel, after which they listen attentively to what will be done in the class as well as the rules. The students listen to the instructions for the warm-up activity and participate in it as a group. The students listen to the learning objective and pay attention	ACTION & EXPRESSION ACTION & EXPRESSION Anticipate and plan for challenges (Consideration 6.2) REPRESENTATION Illustrate through multiple media (Consideration 2.5) ENGAGEMENT Foster belonging and community (Consideration 8.4)
Teacher Input	The teachers go through the vocabulary related to places in town (bike lane, bike station, bus stop, department store, fast food, restaurant, juice bar, library, museum, music venue, skate park,	The students pay attention to the information presented while remaining seated, while also participating and answering questions if asked	REPRESENTATION Clarify vocabulary, symbols, and language structures (Consideration 2.1) Illustrate through multiple media (Consideration 2.5)

	sports center, subway station), by giving a short definition and image to represent it. Moreover, the teachers will relate each word to real-life objects or situations so that students connect the vocabulary with what they normally see.		ACTION & EXPRESSION Anticipate and plan for challenges (Consideration 6.2)
Guided Practice	After the explanation of the vocabulary words, the teachers ask some short questions to recap the contents that were just seen. The teachers proceed to move on to the main activity, for which they give the instructions of the “bingo” game about places in town. The teachers give the instructions clearly: And after making sure everybody understands the instructions (ICQs questions), the teachers will start with the activity.	The students answer the questions they were asked about the contents and listen to the instructions for the main activity and answer the ICQs before starting the activity.	ENGAGEMENT Foster collaboration, interdependence, and collective learning (Consideration 8.3) Nurture joy and play (Consideration 7.3) REPRESENTATION Clarify vocabulary, symbols, and language structures (Consideration 2.1) Illustrate through multiple media (Consideration 2.5) ACTION & EXPRESSION Anticipate and plan for challenges (Consideration 6.2)
Independent Practice	The teachers monitor that the activity is running smoothly by giving clear	The students do the main activity (bingo) and say bingo	REPRESENTATION

	descriptions and answering any questions. After the activity is finished, they make sure that the winner has all the answers correctly and share the results with all the students.	once their sheet is complete. All students review the answers together in order to check who the winner is.	Clarify vocabulary, symbols, and language structures (Consideration 2.1)
Closure	As a closure, a short wrap-up is executed which consists in categorizing each word to the corresponding topic: The teachers will run the activity by asking randomly to give the answers, or also, by doing it all together. After the wrap-up, the objective is shown again to see if it is accomplished, and finally, the teachers praise the students' effort.	The students categorize each word according to the topic by answering questions. The students determine whether the objective of the class was accomplished.	• ENGAGEMENT Promote individual and collective reflection (Consideration 9.3)
